AFTER SCHOOL ACTIVITY PROGRAMS

**Hands-on Science & Math Activities &  
Training for Kids & Adults**

**T**here is really very little that is more exciting than seeing children light up when our teachers fold a plain piece of paper into a paper helicopter and they see it actually whirl down. This is only one of over 100 hands-on activities that our programs offer. **Contact us!**

Feel free to make copies of this

# Have fun with this simple exercise:

Just cut around the solid lines and fold on the dotted lines. Follow the directions below.

**1** Fold the bottom flaps as shown

**2** Fold the wing flaps as shown

Fold dotted lines

**3** Place a paperclip to the bottom as shown

Cut solid lines

Hold it as high as you can and let it drop. Try different sizes of paper chips and move the paper clip around to different places.

What happens if you fold the wings in opposite directions? Experiment with other changes to the helicopter. Have fun!
